# THIS DOCUMENT IS SUBMITTED WITH A ZIP FILE OF THE PROJECT AS A SUPPORTING DOCUMENT

## INTRODUCTION

The Event Hub Ticketing System is a Windows Forms application developed in C#. The system allows administrators to manage users and events, while members can view events, purchase tickets, and view their transaction history.

## SYSTEM FEATURES

The system provides the following functionality:

- User Login
- User Management
- Event Management
- Ticket Booking
- Transaction Recording
- Transaction Viewing
- Navigation Between Forms

## LOGIN FORM

Purpose: The Login Form allows users to access the system.

Steps:

1. Select a role (Admin or Member).
2. If Member is selected, choose a member from the list.
3. Enter the password.
4. Click Login.

Expected Result: The appropriate dashboard opens based on the selected role.

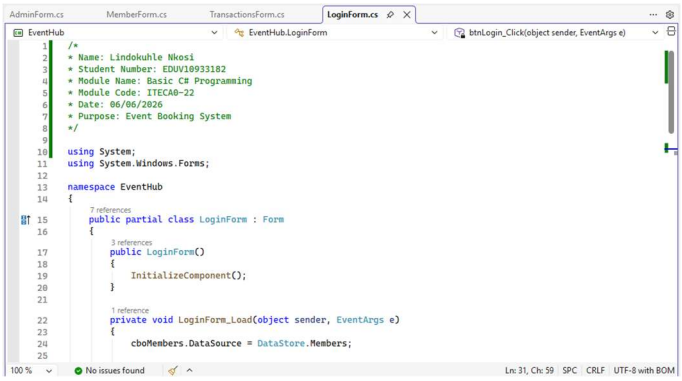

*Figure 1 Login Form*

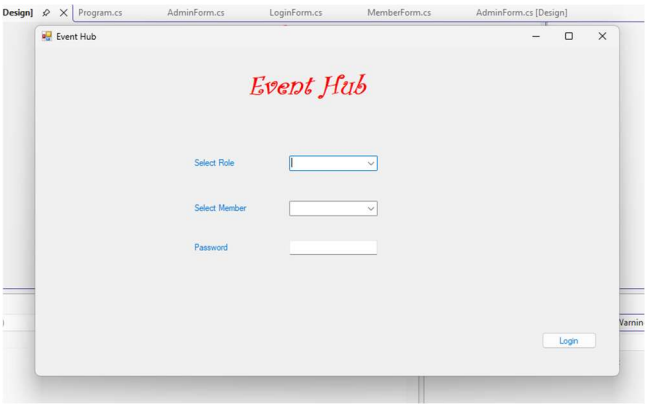

*Figure 2 Login Form Designer*

## ADMIN DASHBOARD

Purpose: Allows administrators to manage users and events.

Functions:

- Add User
- View Users
- Add Event
- Edit Event
- Delete Event
- View Events

Steps:

1. Enter user or event details.
2. Click the appropriate action button.
3. The DataGridView updates automatically.

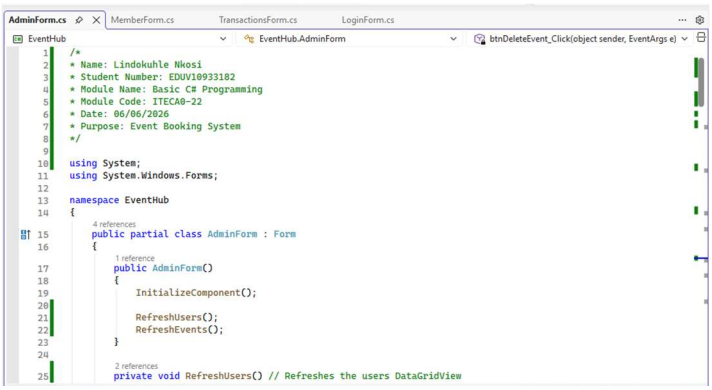

*Figure 3 Admin Form*

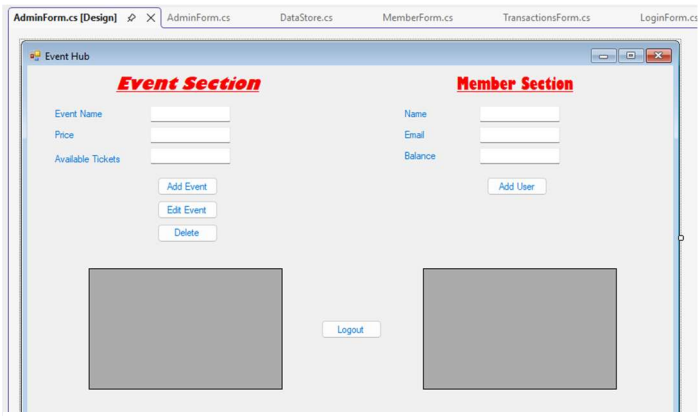

*Figure 4 Admin Dashboard Designer*

## MEMBER DASHBOARD

Purpose: Allows members to book tickets.

Functions:

- Select Event
- Choose Quantity
- Calculate Total Cost
- Book Tickets
- View Transactions

Steps:

1. Select an event from the ComboBox.
2. Select ticket quantity.
3. Click Calculate.
4. Click Book Tickets.

Expected Result: The booking is recorded and available tickets are updated.

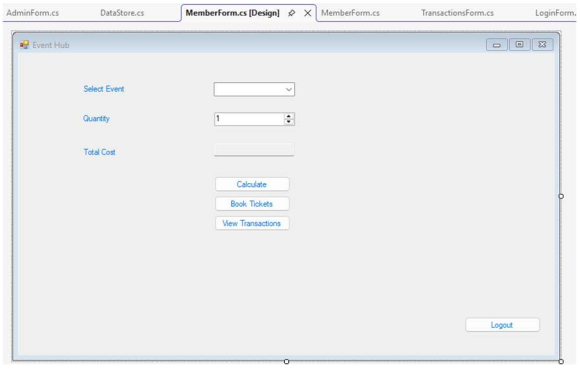

*Figure 6 Member Dashboard Designer*

## TRANSACTIONS FORM

Purpose: Displays transaction history for the logged-in member.

Steps:

1. Click View Transactions.
2. The DataGridView displays all transactions associated with the member.
3. Click Close to return.
4. SYSTEM VALIDATION

The system prevents:

- Booking more tickets than available.

- Booking when balance is insufficient.
- Invalid login attempts.
- Invalid numeric input.

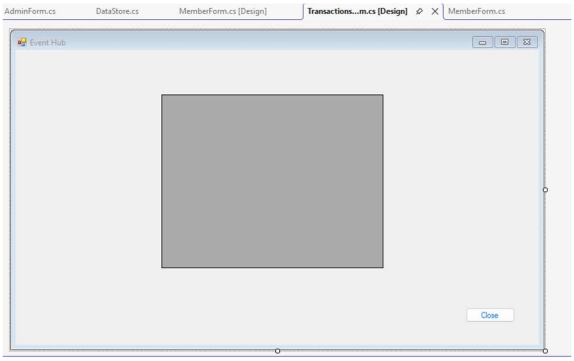

*Figure 8 Transaction History Screen*

## CONCLUSION

The Event Hub Ticketing System successfully demonstrates object-oriented programming concepts including classes, inheritance, interfaces, collections, exception handling, and Windows Forms GUI development.
